Praise may be the cheapest form of (7) - - - -, but we value it highly. As adults, we're pleased by praise from others. Even young children appreciate hearing good things about (8) - - - -, and praise (9) - - - - be a powerful motivator. But is it also possible for praise to backfire? (10) - - - - we give people praise to encourage them to succeed, it may be the case that the words we use can have unintended consequences. And this may be especially true in the case of young children. In an article, researchers (11) - - - - on a study looking at the effect of giving praise. They asked the question: Does praising children encourage them to cheat? Both ability praise and performance praise make people feel good about themselves. Maybe people—and especially young children—don't pay that much attention to the content of the praise but simply focus on the good feelings instead. (12) - - - -, plenty of research shows that even subtle changes in wording can lead to significant changes in behaviour.
